

Powering Business Worldwide

Oil and gas eNewsletter

De-risk by design. For your tough challenges.

To elevate operations, Eaton is here to help you optimize performance, increase operational predictability, as well as protect your people and profit. We serve your oil and gas needs around the world – in upstream, midstream and downstream applications.

Eaton solutions help regulate power in oil and gas fields

Discover how Eaton helped a customer in West Texas correct voltage sags in power distribution lines in oil and gas fields by leveraging the 32-step, single-phase voltage regulator solution.

Did you know?

Eaton's BLACK CAT Frac hose combined with the Eaton Bruiser cover offers 700 times the abrasion resistance of conventional rubber-covered hoses.

World class industrial hose

As Eaton has grown, our vast power management portfolio has expanded as well, becoming one of the world's largest manufacturers of industrial hose.

Watch video

BLACK CAT™ Frac hose offers durability, flexibility and strength

Eaton's BLACK CAT Frac hose, flexible and high abrasion-resistant, is designed for fluid conveyance in fracturing applications requiring extreme durability, quality and performance. Combined with the Eaton Bruiser™ cover, the BLACKCAT Frac hose is tough enough to handle harsh environments, and light and flexible enough to be handled in the field.

Cylinder CAD Configurator

The Cylinder CAD Configurator tool provides price, lead-time and cylinder calculations for force, stop tubes, column strength and additional items, along with technical application guides.

Multi-tap transformer for electrical submersible pump (ESP) applications

Eaton's multi-tap transformers for ESP applications utilize the same reliable manufacturing experience, craftsmanship and robust designs found in our conventional three-phase transformers.

High-pressure hoses access hard-to-reach environments

Read Eaton's article in *Upstream Pumping Solutions* magazine to learn about how equipment manufacturers develop more flexible and durable equipment in response to demanding industry applications.

Clean-in-place filtration technology

Access Eaton's article published in *Filtration News International* for more information on how clean-in-place

filtration technology can make refineries safer, more productive and more environmentally sustainable.
